

Wilsoni Olive

Olea europaea

01-21

<u>Hardiness</u>	<u>Exposure</u>	<u>Soil</u>	<u>Water</u>	<u>Flowers</u>	<u>Height</u>
Zones 8, 9, 11-24, H1, H2	Full sun	Deep uniform	Little to moderate watering	Bears no fruit	25-30 feet

This fruitless variety of olive was discovered in a grove of Manzanillo olives in 1979. The Wilsonii is a clean and well-shaped tree that does not produce fruit and therefore eliminates messy fruit drop. The Wilsonii makes a slow to moderate growth rate, and mature specimens provide a canopy 25 feet high and 25 feet in diameter. These beautiful, dusty green trees are adaptable to a wide range of climates and are hardy to 15 degrees. Thornless, pest free, drought tolerant, and long-lived--the evergreen Wilsonii makes sense for its beauty and practicality.
