

Snow Fountains Cherry *Prunus serrulata 'Snofozam'*

01-30

<u>Hardiness</u>	<u>Exposure</u>	<u>Soil</u>	<u>Water</u>	<u>Flowers</u>	<u>Height</u>
Zones 3-7, 14-20	Full sun	Requires fast draining, well aerated soil	Moderate to regular watering	Single white, early	12-15 feet

Snow Fountains® weeping cherry (*Prunus* 'Snow Fountains' or 'Snofozam') is suitable for landscapes in zones 5-8. Height 8'-15', spread 6'-8'. Snow Fountains blooms best in full sun and well-drained soil. A slow-growing ornamental, the branches of this weeping cherry cascade right down to the ground. For a picture of this spring-blooming favorite, see photo #2 above (accessed by clicking on photo #1 to open the mini-photo gallery).

Snow Fountains and weeping Higan are the first two entries in the present Top 10 list, the other eight members of which we'll encounter on Pages 2 and 3. All the entries on this Top 10 list make excellent focal points in your landscaping. But while on the subject of cherry blossom trees, it's hard to pass over a couple of widely grown specimens with an upright (i.e., non-weeping) form.

One of the most popular Japanese cherry trees in North America, *Prunus serrulata* 'Kwanzan', grows 15'-25' x 15'-25'. Its white to pink blooms will be most impressive when the tree is grown in full sun with good drainage. Zones 5-8.
