Bosnian Pine *Pinus leucodermis*

02-23

<u>Hardiness</u>	<u>Exposure</u>	<u>Soil</u>	<u>Water</u>	<u>Flowers</u>	<u>Height</u>
Zone 2-11, 14-24	Full sun	Well drained soil is crucial to pine good health	Regular watering	4-5" yellow-brown cones, purplish-blue in youth	Slow 50-75 feet tall

The Bosnian Pine is becoming more popular in gardens, both private and public. It has ash gray bark, with ridges exposing yellow-gray patches. The needles are in pairs, 2 to 4 inches long, 1 1/2 inch wide, stiff, dark green, lined, and have 1/2 inch long sheaths. The needles remain for 5 or 6 years. The cones are oval, 4 to 5 inches long, yellow-brown, and purplish-blue in youth. This tree is reportedly particularly suitable to dry and chalky soils.
