

Aptos Blue Redwood

Sequoia sempervirens

02-33

<u>Hardiness</u>	<u>Exposure</u>	<u>Soil</u>	<u>Water</u>	<u>Flowers</u>	<u>Height</u>
Zone 4-9, 14-24	Full sun or light shade	Slightly acidic, slightly alkaline	Regular watering during the summer, established tree Gets all the water it needs from fog drip	Brown inconspicuous flower, with brown medium sized cones	70-90 feet tall

Redwood (*Sequoia sempervirens*), also called coast redwood and California redwood, is native to the central and northern California coast, a region of moderate to heavy winter rain and summer fog so vital to this tree. It is one of three important North American trees of the family Taxodiaceae. Close relatives are the giant sequoia (*Sequoiadendron giganteum*) of the Sierra Nevada in California and the baldcypress (*Taxodium distichum*) of the southeastern states.
