

Boston Ivy *Parthenocissus tricuspidata*

04-19

<u>Hardiness</u>	<u>Exposure</u>	<u>Soil</u>	<u>Water</u>	<u>Flowers</u>	<u>Height</u>
Zones 1-24,	Sun or shade	Thrive in organically rich soil	Moderate watering	Blossoms are insignificant, more noticeable are clusters of small blue-black fruit that form in late fall	Are said to grow 50-60 feet

A strong-growing, self-clinging vine adhering itself to supports by means of adhesive pads at the ends of leaf tendrils. Tall-growing, it reaches a height of 10-20m (1-2m of annual growth). Healthy and undemanding species, but may freeze during severe winters. Leaves dark green, turning brilliant scarlet in autumn, the variegation being more dramatic in a sunny position. Excellent on buildings, but is also suitable for growing over arbors, pergolas and various supports.
