

Mediterranean Fan Palm

Camaerops humilis

06-02

<u>Hardiness</u>	<u>Exposure</u>	<u>Soil</u>	<u>Water</u>	<u>Flowers</u>	<u>Height</u>
Zones 4-24, H1, H2	Full sun or partial shade	Tolerates poor soils	Moderate to regular watering	Inconspicuous yellow flowers in the summer	Up to 20 feet tall

The Mediterranean Fan Palm is one of the most successful palms for general use in landscaping under a wide range of conditions. Its broad spread, multiple trunks, and dark green foliage make it an excellent choice as an accent tree. Extremely hardy to 6 degrees, it also does well in hot, dry desert regions. The Mediterranean Fan Palm is a relatively slow growing palm, reaching a height and canopy spread of twenty feet at a rate of six inches per year with feeding and good drainage.
