

Brilliance Autumn Fern

Dryopteris erythrosora

07-05

<u>Hardiness</u>	<u>Exposure</u>	<u>Soil</u>	<u>Water</u>	<u>Flowers</u>	<u>Height</u>
Zones 2-9	Part sun to light shade	Grows well in organically enriched soil	Regular watering	Bright red spores produced on the underside of fronds	To 2 feet tall

This selected form of autumn fern has brighter red new growth than what is typically seen with spore-grown plants. Frankly, all autumn ferns have great color when the new fronds emerge from the evergreen clump, so this is really something special. Autumn fern is a very easy-to-grow fern making a 2' wide clump that is tolerant of a wide range of garden conditions including extreme drought once established.
