

## Italian Cypress *Cupressus sempervirens 'Glauca'*

10-04

<u>Hardiness</u>	<u>Exposure</u>	<u>Soil</u>	<u>Water</u>	<u>Flowers</u>	<u>Height</u>
Zones 1-24	Full sun or partial shade	Although extremely tolerant to various soils grows slower and shrubbier in poor soil, Much larger if given good soil	Little to no water to regular watering	Produces no flowers	40-60 feet

The perfect compact Italian cypress that retains its small size indefinitely. Exceptionally dense, blue-green foliage on a rigid, columnar form is a valuable architectural accent both in the summer and under winter snow. Perfect in containers and for small, high-profile city gardens. Requires no shearing but adapts well to topiary applications. Full sun. Very slow growth to just 8 feet tall and 2 feet wide in first decade, then 25 or 30 feet tall, and to 3 feet wide at maturity.
