

Spiral Dwarf Alberta Spruce *Picea glauca* 'Conina'

10-08

<u>Hardiness</u>	<u>Exposure</u>	<u>Soil</u>	<u>Water</u>	<u>Flowers</u>	<u>Height</u>
Zones A1-A3, 1-7, 14-17	Full sun or light shade	Spruces have no special soil requirements	Little to moderate watering	No Flowers	Reaches 6-8 feet tall

Alberta Spruce 'Spiral' and 'Poodle': These very distinctive trees have been clipped into exquisite shapes. It is actually a pyramidal but can be clipped to almost any shape. It's feathery light green needles are exceptionally attractive right through the summer. However it is subject to winter burn so a sunny location and winter protection are recommended. Note: Purchase these trees full grown, although the expense is much higher so is the success rate.
